

TRANSPORTATION POLICY STATEMENT 2020/2021

Document #	Effective Date	Next Rev Date	Department	Location	Rev #
HSE-POL-005	2020	2021	QHSE	Echo))) Drive	000

This Policy covers all Echo Seismic work activities

All employees and contractors of Echo and its subsidiaries recognize that transportation exposes employees to more risk than any other activity associated with Company operations. To reduce transportation risks to an acceptable level, this Policy and company procedures MUST be adhered to for ALL vehicle and vessel operations conducted.

Responsibility for compliance with transportation regulations pertaining to vehicle and vessel operations lies with both the operator and Echo management. It is the sole responsibility of the operator for compliance with the requirements of this Policy and all related vehicle/vessel operation procedures specific to Echo business units.

Vehicle/vessel operators shall report all violations received, as well as all events that occur regardless of severity, to their supervisor. Supervisors are required to report the event to the site manager who will ensure a proper investigation and follow-up is conducted.

It is the responsibility of each operator to ensure that he/she is aware of all rules and regulations that apply to the operation of vehicles/vessels they are assigned to operate. Ignorance of the law or applicable regulations is not acceptable as an excuse for non-compliance.

As part of the Echo transportation safety requirements, the Company strives to:

- Maintain the highest standards possible when employing and training licensed vehicle and vessel operators.
- Ensure operators are aware of and adhere to all applicable laws within the country or region of operation.
- Provide quality training to operators and personnel responsible for managing transportation activities.
- Ensure resources are available to operators in order to fulfill "hours of service" requirements, where required.
- Maintain job rotation schedules and limit work hours to help control worker fatigue.
- Ensure management and operators select and use vehicles/vessels of the correct size and design for the intended use.

Operator Certification – All vehicle/vessel operators require valid certification for the country of operations. Motor vehicle operators require a periodic review of driver abstract/record for clarification of non-violation / violation of traffic laws. All traffic law violations received by an individual must be reported to and assessed by management to determine if Company driving privileges will be denied or maintained. Vehicle/vessel operators are held personally responsible for any citation issued by an enforcement agency.

Operator Training & Qualifications - Only approved personnel are allowed to operate vehicles/vessels on behalf of Echo including Company-owned or leased vehicles/vessels or vehicles/vessels rented for business purposes. Only vehicle operators who have completed DriveSafer training or other approved driver training and who have passed the driver assessment requirement are permitted to operate vehicles on behalf of the Company. Personnel who operate Company vehicles/vessels (owned, leased or rented) are required to participate in the Company drug and alcohol program specific to the country of operation or business unit.

Safety Equipment - All persons must wear safety belts at all times when operating or riding as a passenger in a vehicle fitted with safety belts. Prior to departure, drivers are responsible to ensure all passengers are wearing safety belts. (*Refusal or failure to wear safety belts could result in disciplinary action up to and including termination*). PFD's are required to be worn during vessel transport as required for vessel type used for transport of all personnel.

Smoking – Smoking is prohibited in company vehicles/vessels including rented or leased equipment.

Journey Management - All operations must have in place an active journey management program. Journey Management programs must address all local driving and sea state conditions, identified risks and include the development of Mob/De-mob plans for every location move (individual operator and crew).

Distracted Driving – Echo prohibits the use of cellular telephones and other hand operated devices that may distract a driver's attention while operating a company owned, leased or rented vehicle/vessel. This includes:

- Texting, e-mailing or entering information on GPS units or smart phones.
- Operating electronic devices i.e.: laptop computers, video games, cameras, video displays and portable audio players.
- Reading printed materials, writing, printing or sketching while the vehicle/vessel is in motion.
- Personal grooming or eating that results in obvious distraction of vehicle/vessel operation.

Hands free devices may be used however this activity must be minimized and it is advised that the vehicle operator stops the vehicle in a safe location to complete a conversation as it may result in the operator being distracted from the task of operating the vehicle.

The operator of any Company vehicle/vessel who fails to comply with the above Policy, or refuses to participate in the programs associated with this Policy may have their operator privileges suspended and/or face disciplinary action up to and including termination.
